

Summer Village of Ross Haven

Dead and Dangerous Tree Policy

Approved by the Risk Management Committee March 16, 2004

Policy Statement

The Summer Village of Ross Haven would like to inspect and remove all dead and dangerous trees within the Village boundaries which are located on municipal property in a timely fashion and within financial constraints.

Reason for Policy

The Summer Village of Ross Haven has deemed it necessary to remove the dead and dangerous trees, to lessen the likelihood of personal or property damage.

Related Information

The Summer Village of Ross Haven annually budgets \$2000.00 per year for tree removal.

For each tree removed, the Summer Village will replace the tree with a new suitable tree to be planted within the Summer Village boundaries.

Responsibilities

It will be the responsibility of the majority of the Risk Management Committee to complete an annual checklist and identify which trees are to be removed. Trees are to be marked with spray paint for identification. The Risk Management Committee will determine in which order the trees will be removed according to their financial constraints. If in any given year all of the identified trees cannot be removed, they will be carried forward to the next budget year.

Checklist

Area's to be inspected

Area	Number of Trees to be Removed	Number of Trees Carried forward	Date
Park 1			
Park 2			
Park 3			
Park 4			
Park 5			
Park 6
